

Kidney Cancer Canada is a patient-led support organization established to improve the quality of life for patients and their families living with kidney cancer.

Kidney Cancer Canada advocates for access to new treatments, provides support and information to patients, and works to increase awareness of kidney cancer as a significant health issue.

We encourage all attendees to register with Kidney Cancer Canada. Registration keeps you up to date with our e-Newsletter and online discussion forum. Please join today!

Your support is vital to help us identify current issues and concerns of kidney cancer patient and caregivers, and to continue working to improve the lives of everyone touched by kidney cancer.
